MUNASHE WALTER JOJO

Graduate Industrial Electronics Engineer | Automation & Control Systems

0784 600 988 / 0715 995 667 jojomunashe@gmail.com www.munaxxe.co.zw Harare, Zimbabwe

Executive Summary

Adaptable First-Class Industrial Electronics Engineering graduate with hands-on experience in industrial automation, control systems, PLCs, microcontrollers, electrical maintenance, fault diagnosis, and solar and low-voltage DC systems, combining strong technical expertise with the communication and client-facing skills to deliver practical engineering solutions, backed by a clean Class 4 Driver's License and strong adherence to SHEQ standards

Work Experience

Field Installation Technician (Part-time) - Design At 7 (Eastgate, Harare) **|** May 2026 – current:
Responsibilities:

- Wiring, configuring, and commissioning Dragino IoT-based security and monitoring systems on 11kVA ground and pole mounted transformers, ensuring remote monitoring and ZESA compliance
- Managing job cards and installation records, performing system testing, fault diagnosis, and maintenance in collaboration with Powertel technical teams

Assistant Workshop Manager - Tech Africa (Workington, Harare) **|** Jan 2026 – Feb 2026:
Responsibilities:

- Managed job card administration on Sage Pastel for servicing and repair of generators, water pumps, VFDs, compressors, and industrial equipment
- Coordinated workshop scheduling and technician allocation to meet maintenance and repair turnaround targets
- Conducted quality assurance and PDI inspections to verify service accuracy and equipment reliability
- Liaised with clients on job status, technical findings, and repair outcomes, supporting service reporting and inventory tracking

Key Achievement: Maintained a zero-return job record in 2026 through consistent quality control and thorough inspection of completed work

Technical Projects Assistant - KFM Consultants (Mabelreign, Harare) **|** Dec 2024 – Jan 2026:
Responsibilities:

- Delivered technical support across a portfolio of 10+ properties, troubleshooting electrical and power system faults to sustain operational performance
- Supported project execution by procuring materials, planning maintenance, and supervising electrical installations across 5 major cities in Zimbabwe, liaising directly with clients and site contacts
- Prepared technical reports tracking system performance, maintenance activities, and reliability trends
- Diagnosed and resolved electrical and power system faults to maintain safe, stable, continuous operations

Key Achievements: Supported an electrical system upgrade for a residential property in Harare North, contributing to resale within one month; and implemented structured preventive maintenance at a 15-bedroom rental property in Gweru, sustaining over 91% occupancy in 2025

Instrumentation and Process Control Intern - Turnall Holdings (Southerton, Harare) **|** Feb 2022– Dec 2022
Responsibilities:

- Wired, calibrated, and programmed Mitsubishi and OMRON PLC/VFD systems with Proface and Delta HMIs
- Installed and maintained load cells, industrial sensors, and control systems
- Performed preventive maintenance, fault finding, and repairs on electrical, mechanical, and instrumentation systems
- Prepared performance reports and supported production optimisation using lean manufacturing principles
- Assisted with research and development to improve product quality and consistency

Key Achievements: Reintroduced a daily machinery condition monitoring checklist for the Tile Plant, cutting unplanned downtime by over 90%, and contributed to restoring an IBR roofing sheets plant by configuring a Delta HMI integrated with a Mitsubishi PLC to bring automated operations back online

Computer Literacy and Technical Skills

- Automation and Control: PLC programming, VFD configuration, HMI integration, sensor and actuator calibration, system troubleshooting
- Embedded Systems and IoT: Raspberry Pi, ESP32/ESP8266, PIC microcontrollers, sensor integration, real-time monitoring systems
- Electrical and Power Systems: Electrical maintenance, fault diagnosis, preventive maintenance, solar PV systems, generator commissioning, transformer and security system installation
- Programming: C/C++, Python, HTML/CSS, JavaScript
- Engineering Software: SolidWorks, AutoCAD, MATLAB, Sage Pastel
- Productivity and Project Tools: Microsoft Project, Excel, Word, PowerPoint, Teams, Zoom

Education

Practical Solar PV Installers Course: PFN Solar Systems (Aug 2024)

Bachelor of Engineering (hons) degree in Industrial Electronics Engineering (First Class): Chinhoyi University of Technology (2023)
